

# Bird Finance Smart Pool Tutorial

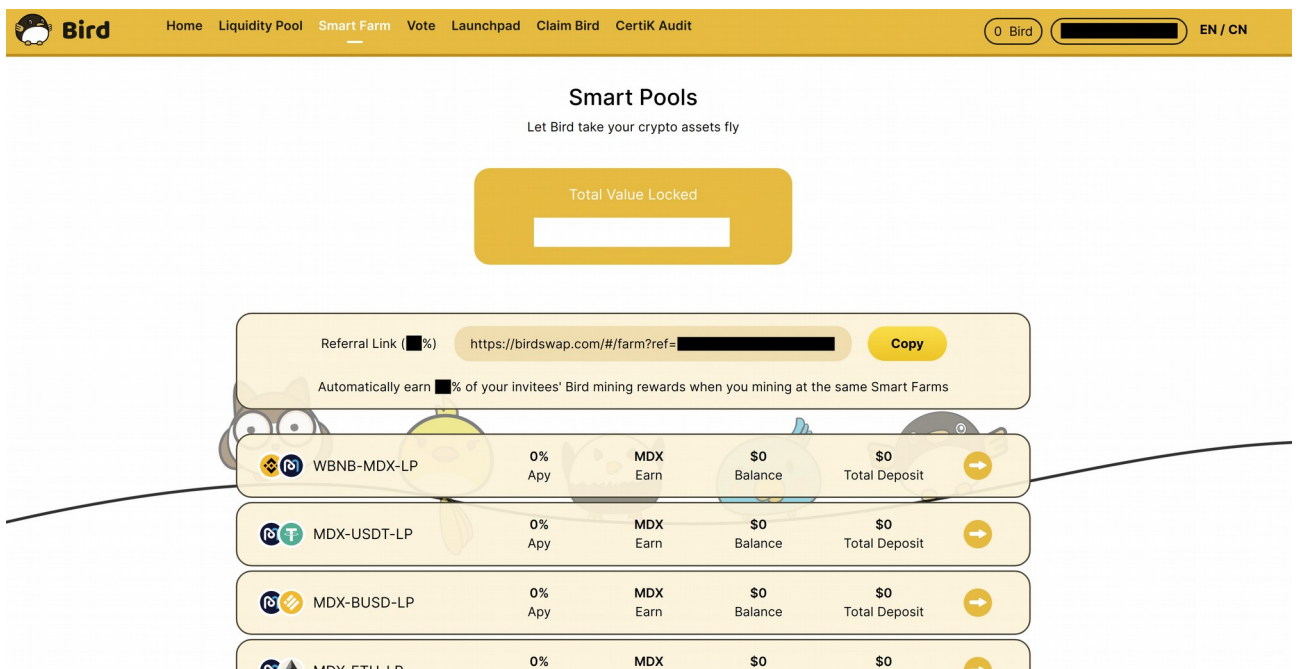

1. go to <https://birdswap.com> or <https://birdswap.finance>

2. Click “ Smart Farm” on the top tab.

3. On the new page.

We blur some dynamic information. There is a list below which lists all supported mining pools.

The “**Referral Link**” is a URL you can copy to your friends. If they use your invitation link for liquidity pool, you may get 10%(currently, may changes further) more token as bonus.

E.g., WBNB-MDX is an entry of smart pool, which ask you to stake WBNB-MDX pair on Mdex and promise you to earn MDX.

You can move cursor onto “Apy” to see more Apy details. Besides “Balance” and “Total Deposit” shows how many tokens you stake in USDT and how much the smart pool values totally.

You can now click the entry into a detail page

Compound Your Bird to earn more Bird!

★ Compound Bird ★

Please refer below instruction

## 4.1 Summary

On the top bar, it shows which token this smart pool handles, APY it produces approximately and a quick link to help you get that token.

## 4.2 Stake

On the left middle box, it shows how many unused tokens you have, you can input an amount to stake your token into smart pool.

## 4.3 Reclaim

On the right middle box, it shows how many bToken you get. The bToken is the certificate/share which records how many tokens you staked. **You can withdraw tokens by consume bTokens.**

Along with compound action, the tokens in the smart pool shall get more and more, obviously it comes from the yield/earn. As consequence, the bTokens worths more and more.

Here is an example:

At very begin you stake 10 WBNB-MDX-LP into the smart pool and it returns your 1 bToken to records your share.

After a long period with compounding, now your 1 bToken worths 15 WBNB-MDX-LP, among which 10 is your capital and 5 is benefit from yield with compounding.

Now if you withdraw all your bTokens, you shall get 15 WBNB-MDEX-LP.

## 4.4 BIRD Mining

On the bottom box, **you can use your bToken to earn BIRD if available!!!**

There is nothing different between bToken BIRD liquidity pool and normal liquidity pool.

If you think your bTokens are there and want to produce some benefit, stake them into the mining pool and earn BIRD.

The “**Mined**” shows how many BIRD which you have mined but does not withdraw.

The “**Referral**” shows how many BIRD which belongs to you as invitation bonus but are not withdrawn.
